Tip or Complaint: Mr Dave Ward was notified that over 100,000 gallons of untreated waste water was being leaked into the underground water table and drinking water over 2 months ago and still has refused to call the proper people to fix the problem. That waste water is under the lining in waste water pond 2 under a liner and is seeping into the phoenix drinking water. We have already got a notice of high levels of arsenic in the drinking water and still nothing has been done to correct it. The warden mrs tracy and Mr dave ward have given direct orders to Mr. Allen case to have the

federal inmates make home made weapons to puncture the lining to drain the waste water into the local water ways to get rid of the evidence. I hope you will take charge of this before the news papers do Thank you for your assistance in this Matter

Specific Directions: I 17 north to pioneer exit and follow the road 2 miles to FCI Phoenix federal prison.
